ragent Tools Reference — Index

The tools available to ragent agents, organised by category. Each category has its own document with per-tool arguments, required flags, typical values, and worked examples.

> **Scope:** Tool names, parameter schemas, and usage patterns for every registered tool plus the dynamic `mcp_tool`. This is the canonical place for the tool count: the default build registered 150 tools at v1.0.168, and `ragent --dry-run --json run x` reports the live figure (the `total` item of its `tools` section, followed by one item per permission category). `mf_screenshot` adds one when a drivable headless browser engine is present. For TUI workflow see `docs/howtos/tutorial.md`. For team coordination see `docs/howtos/teams.md`.

Categories

#	Document
1	file-operations.md
2	shell.md
3	search.md
4	web.md
5	masterfetch.md
6	code-intelligence.md
7	memory.md
8	git.md
9	github.md
10	gitlab.md
11	office-pdf.md
12	teams.md
13	sub-agents.md
14	planning.md
15	spec-management.md
16	task-management.md
17	scheduling.md
18	initiatives.md
19	mcp.md
20	skills.md
21	interactive.md
22	utility.md

Every listed tool is advertised to the model whenever ragent's tool registry registers it; `mf_screenshot` is the one conditional entry (a drivable headless browser engine must be present).

All documents are also available as PDFs under `pdf/`.
