ragent Tools Reference — Index

The tools available to ragent agents, organised by category. Each category has its own document with per-tool arguments, required flags, typical values, and worked examples.

> **Scope:** Tool names, parameter schemas, and usage patterns (149 registered tools in the default build — 150 when a drivable headless browser engine is present, so `mf_screenshot` registers — plus the dynamic `mcp_tool`). For TUI workflow see `docs/howtos/tutorial.md`. For team coordination see `docs/howtos/teams.md`.
