Tools — Planning

Delegate read-only analytical work to the plan agent.

Tool	Description
`EnterPlanMode`	Delegate to the plan agent for read-only analysis.
`ExitPlanMode`	Return the plan result to the previous agent.

Visibility switch: `plan`.

EnterPlanMode

Enter plan mode / delegate analysis to the plan agent. The plan agent is read-only: it explores the codebase and produces a structured implementation plan without making any changes.

Arguments

Argument	Type	Required	Description
`task`	string	yes	What to plan or analyse
`context`	string	no	Additional background for the plan agent

```
EnterPlanMode task="Plan the migration of the config loader to TOML" context="Keep JSON support"
```

ExitPlanMode

Return control from the plan agent to the previous agent. Use it inside a plan session once the requested analysis is finished; it does not modify files.

Arguments

Argument	Type	Required	Description
`summary`	string	yes	The plan or analysis result to return to the calling agent

```
ExitPlanMode summary="Three-step migration plan: ..."
```
