/status

Show status message history: /status [clear]

Overview

`/status` shows the history of status-line messages recorded in this TUI session, newest first, or clears it. The history keeps the most recent 100 messages (`StatusHistory` in `crates/ragent-tui/src/theme.rs`); messages are recorded when a command sets a working/in-progress status.

Syntax

```
/status
/status clear
```

Options / Subcommands

Form	Description
`/status`	Lists the recorded status messages, newest first, each with its age in seconds.
`/status clear`	Empties the history.

Any other argument prints a usage warning.

Examples

`/status`

Shows the status history.

`/status clear`

Clears it.

Output

`/status` prints a `## Status history (newest first)` list in the message window, one `- <N>s ago: <message>` line per entry, or `No status messages recorded yet.` when the history is empty. `/status clear` prints `Status history cleared.`
