

Tools — Browser Automation

Chrome DevTools Protocol (CDP) automation. Requires a running Chrome/Chromium launched with `--remote-debugging-port=9222`; use `action`: "setup" to launch one automatically.

Tool	Description
browser	CDP automation: open, snapshot, click, type, fill forms, screenshot, etc.

Use cases: interacting with dynamic web pages, form filling, screenshots, uploading files into web forms.

Visibility switch: browser (see docs/howtos/tool-visibility.md).

browser

Drive a Chrome/Chromium instance via the DevTools protocol.

Arguments

Argument	Type	Required	Description	Typical value
action	enum	yes	One of: open, snapshot, click, type, fill_form, select, wait, eval, scroll, upload, press, screenshot, status, setup	"open"
url	string	yes for open	URL to navigate to	"https://example.com"
selector	string	action-dependent	CSS selector for click, type, select, upload, wait	"#submit"
text	string	action-dependent	Text to type (type) or key to press (press)	"Enter"
value	string	no	Value for select option (select)	"Option1"
fields	object	no	Map of CSS selector to value for fill_form	{"#user": "me", "#pass": "pw"}
expression	string	yes for eval	JavaScript expression to evaluate	"document.title"
file_path	string	yes for upload	Path of the file to upload	"assets/logo.png"
condition	enum	no	Wait mode: load, selector, time, none	"load"

Argument	Type	Required	Description	Typical value
milliseconds	integer	no	Wait duration when condition="time"	500
scroll_x / scroll_y	integer	no	Scroll offsets for scroll	0 / 600
css_selector	string	no	Narrow snapshot scope	"main"
full_page	boolean	no	screenshot: capture the full scrollable page	false
wait	boolean	no	open: wait for page load	true
headless	boolean	no	setup: run browser headlessly	true
port	integer	no	setup: CDP port	9222

Example:

```

browser action="setup"
browser action="open" url="https://example.com"
browser action="snapshot"
browser action="click" selector="#login-button"
browser action="type" selector="#username" text="alice@example.com"
browser action="screenshot" full_page=true

```
